TITLE : JAM-LIKE FOOD

ABSTRACT : PURPOSE: A jam-like food that is substantially composed of raw fruit pulp and sweet thickener, thus being suitable for use as a pie filling because it keeps the texture and taste of the raw fruit, shows a jam-like appearance.

CONSTITUTION: Raw fruits are cut into pieces of an appropriate size such as 3~20mm, then mixed with a thickener such as a gum such as xanthane gum or starch thickener from wheat flour, preferably a combination of starches in the alpha form and in the nonalpha form, and a sweetener such as sugar, then they are heated so that the fruits may not soften, remaining substantially in raw state, for example, the heating is stopped, when the temperature reaches 75~ 100°C.
